NOTE TAKER

I have a bunch of notes to take. They could be for school, they could be for personal project I'm doing, or they could even be for music lessons. The possibilities are endless. If I think of something funny or even a good joke, that could also go here.

And another note that can be completely useless. Another note to remind me about my partner's b-day

It can be anything from a funny quote, an inspirational quote, to a little blerb about yourself. Something short and sweet.
